

AUSTRIA'S LANSERHOF LANS WINS TATLER SPA AWARD FOR THE MEDICAL MAESTRO CATEGORY

Lanserhof Lans – Austria's newly renovated architecturally resplendant medical spa – has been announced as the winner of the 2017 Tatler Spa Awards in the category 'Medical Maestro', recognising their outstanding contribution to the wellness industry.

Held on Monday 24 April 2017 at the stunning Corinthia Hotel in London, guests and nominees travelled from all over the world, joining together to celebrate outstanding contributions to the world of all things spa.

Since re-opening their doors in January 2017, the Lanserhof Lans has celebrated a welcoming and hugely positive response from both their loyal guests and new visitors alike. The facility's state-of-the-art, minimalist design is brought to life by award-winning architect Christoph Ingehoven; whose contribution to the award-winning Tegernsee property has been pivotal in transforming the guest experience.

As winners of the Tatler Spa Awards 2017, Lanserhof Lans has not only been acknowledged for all of their hard work, but also rewarded with a trusted mark of excellence which is widely recognised by both luxury consumers and travel professionals.

On winning the award Nils Behrens, CMO of the Lanserhof said *"We are extremely honoured to have been recognised for a second time by the Tatler spa awards, particularly in only our fourth month after reopening! The tatler spa awards are one of THE accolades to win the world of spa and this recognition proves that our medical concept and state-of-the art facilities continue to provide an innovative and longlasting approach to health and wellbeing."*

The Lanserhof: For 30 years the Lanserhof medical institution has been practising the LANS Med concept, a symbiosis of traditional naturopathy and state-of-the-art medicine treating both mind and body. In January 2014 a new Lanserhof health clinic opened on the shores of Lake Tegernsee in Germany. Designed to support the natural healing process, Lanserhof Tegernsee promotes physical well-being and inner balance, with great focus on personal regeneration.
